## GENERAL SERVICES ADMINISTRATION

*Region 3*  
*Washington 25, D.C.*

FEB 27 1963

IN REPLY REFER TO:

**Mr. James A. Garrison**  
**Director of Logistics**  
**Central Intelligence Agency**  
**Washington 25, D. C.**

**Dear Mr. Garrison:**

Members of my staff have inspected the Central Intelligence Agency Headquarters Building and have been working with the Buildings Manager to correct the cleaning problems described in your letter of February 15, 1963.

Some of the security areas present cleaning problems because the cleaners have difficulty in gaining access to them. Supervisors have been instructed to note these areas and to work with the occupants to establish schedules whereby the required cleaning can be accomplished. In addition, supervisors have been instructed to give close attention to the cleaning personnel to see if they require additional training or follow up.

The inspection of restrooms indicated they were in good condition. Some soap dispensers were not working properly and action will be taken to correct this. Action will also be taken to service overflowing waste towel receptacles.

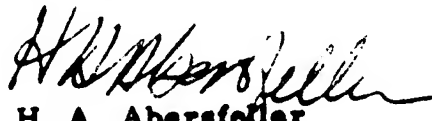

In order to improve the appearance of floors Mr. Dodd, the Buildings Manager, is initiating the use of commercially treated floor cloths. These cloths will be more efficient than the sweep mops presently in use. We are also examining the feasibility of letting a limited contract for floor waxing.

These arrangements should improve the condition of floors. However, there appeared to be an excessive amount of spillage in corridor areas adjacent to vending machines. This spillage creates an unsightly condition and imposes abnormal demands on the cleaning force.

100-3-1240

We are making a month by month evaluation of our cleaning expenditures so that as circumstances warrant we can take immediate steps to provide additional cleaning personnel.

Sincerely yours,

H. A. Abersfeller  
Regional Administrator
